

# Digital Construction & Engineering Traineeship Programme

Delivered in Yorkshire with Remote options available

## 6 Week Specialist Training with Work Experience

### **BIM & Revit Specialist Training & Building Materials in Construction,**

You will use the latest software to produce a model including material specifications, drawing outputs and learn how to issue, store & retrieve relevant information relating to Construction Projects through a common data environment

### **70 hours Work Experience**

You will be allocated a work placement in the industry to gain skills, knowledge and experience in the sector plus a guaranteed interview on completion

### **Work Preparation**

Your programme will include sessions on CV Writing, Interview Skills & Job Search to support your progression into employment and an apprenticeship

*Completion incentives and travel expenses will be provided based on meeting the traineeship requirements, 100% attendance and successful completion of the programme*
